

Click to Call

Empower Customers to Contact You Freely

BENEFITS

Simplify Customer Contact –

Allow your web visitors to contact you from any web enabled application with the click of a button. It's fast, easy and free for the caller.

Reduce Site Abandonment –

Allowing your viewers to contact you by an additional medium means they have more options and flexibility to get in touch before they decide to go elsewhere.

Reduce Operating Costs –

Reduce operating costs by directing online 1-800 traffic to our service. Direct callers from specific pages to predetermined contact numbers.

Wide Feature Selection – Have the ability to record incoming calls, collect voice mails when unavailable, direct callers to multiple numbers with call follow me, collect online leads, display custom web messages, harness our custom API, white label branding and a virtual calling card to name a few.

No Additional Equipment – Use your existing telephone equipment and infrastructure. No additional hardware is required to use the service.

Implement Fast & Easy – Get your own Click to Call link in less than 5 minutes after you register.

Comprehensive instructions allow you to create a link for any web enabled application.

ABOUT CLICK TO CALL

Use Click Click Call to empower your customers to contact you through an additional medium with the click of a button. Give them the opportunity to get in touch with you at the moment they make the decision, before they decide to go elsewhere. Engage your web viewers proactively and increase the web viewer experience. Our unique Click to Call technology allows your web viewers to connect seamlessly from the internet to you over the phone. There is no cost to the web viewer, and the easy to use connect window allows a convenient way to connect to you. There is no need to remember, or write down phone numbers, they simply enter their number in the connect window. The service then places a call to both parties which is then connected.

Click to Call, Much More Than Just a Phone Call

Click to Call not only allows your web viewers to place a phone call with the click of a button, it also allows you to increase your sales conversion rates, reduce website abandonment, increase customer loyalty and retention, reduce operating costs, and most importantly increase your customers satisfaction and experience.

Click to Call can be used in many applications ranging from personal emails to online blogs and social networking sites, personal websites to large intricate online directories and classifieds. Resellers and directory sites have the ability to co-brand a solution to provide their customers an easy and cost efficient Click to Call solution. Help your customer's increase their conversion rates at a minimum cost.

Click Click Call's wide array of features provides a multitude of capabilities to the user. Configure your Click to Call service to function the way you want it to, when you want it to. Generate online leads from web visitors, create custom ad rotation in your online connect windows and find out where your visitors are calling from. Our easy to use link generation tool allows you to create a Click to Call link for a multitude of online web applications in a few simple steps.

Start using Click Click Call today and experience firsthand the benefits the service can provide to both the web viewer and yourself. Rest assured that Click to Call offers the widest array of features at the lowest possible cost anywhere on the internet!

Click to Call

Empower Customers to Contact You Freely

APPLICATION EXAMPLES

eBay Pages – Add Click to Call to your eBay pages and allow potential customers to contact you with a click. The call is free for them, and you can keep your number private.

Personal Emails – Add a Click to Call link to your personal emails and allow all of your email contacts to contact you free of charge. Send emails around the world and receive calls just as easily.

Blogs & Online Communities – Add your own Click to Call link to your online blog or community. Allow your friends to contact you directly from your profile with the click of a button. Keep your number private, and see who's been calling.

Small Business – Give your web viewers the ability to get in touch with you when needed. Simply add a link to your contacts page.

Large Business – Reduce toll costs to 1-800 numbers by using Click to Call instead. Keep track of your callers, display custom messages, record calls for quality assurance and have us take the message when you're not there.

Online Directories & Classifieds – Add Click to Call to all of your customers contact info. Our easy to use API allows quick and efficient management of all your customer numbers.

FEATURES

Virtual Calling Card – Use our virtual calling card to place calls to any number you desire. Take advantage of our low long distance rate to make your calls now.

Voice Mail – Configure Click to Call to take the message for you when you're not available. Optionally have us email your voice mail messages as well.

Caller Notification – Have Click Click Call notify you when you have an incoming call. Pre-configure your account to indicate where a caller is calling from before you take the call.

Customized Greeting – Customize the greeting your callers hear before they are connected with you. Record multiple greetings played with pre-determined probability.

Extensive Coverage – Get yourself covered in over 52 countries! This means you can place calls, and receive calls from up to 52 different countries in our coverage area.

Call Follow Me – Configure Click Click Call to call your predetermined numbers at the times you specify. If you are not available at the first number, the next one will be tried in sequence until you are reached, without the caller noticing.

Call Recording – In a call center environment quality control is very important. Track your calls and review recordings to ensure your calls are handled properly.

Web Messages – Configure your web connect window to display the message and graphic you desire. Add multiple messages and preset their display probability.

Lead Generation – Generate online leads by optionally collecting name, email and phone number information from viewers using your connect window.

Custom API – Use our custom Application Programming Interface to add new customer accounts and maintain existing ones. Automate the process and make life easier.

Co-Branding – Co-Brand our connect web interface to allow you to have your very own Click to Call service. Display your own images and messages to your customers.

Easy Integration – Use our user friendly link generation utility to generate a link for any web application. Get up and running with Click to Call in less the 10 minutes.

Shared Management – Allow access to multiple users who can help create and maintain your accounts.
